Art Unit: 3712

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-10 and ¹²~~21~~-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are indefinite because they are not drawn to the same subject matter as the claims from which they depend. Note that claims 1 and 11 are drawn to an envelope, bag or other mailing device. The dependent claims are drawn to an envelope only.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over the applicants own disclosure of the prior art in view of Soderhold et al. The applicant discloses that most of the elements of the claims are conventional but for the protrusions (presumably the bubble pack referred to by the applicant in the description of the state of the art does not have protrusions). Soderhold discloses a shock protection envelope having protrusions extending inwardly from walls of the envelope. It would have been obvious in view of Soderhold to provide prior art packaging envelopes with protrusions on the inner surfaces of their walls in order to enhance the protection afforded by the packaging.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3712

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-32 rejected under 35 U.S.C. 102(b) as being anticipated by either Hardy or Brosmith et al or Marconi. These references all disclose shock protective packaging having front and back panels and various kinds of protrusions protruding inwardly from the panels to protect the contents of the packaging. Note for example only each limitation of claim 1 and how it is clearly shown to be conventional by more than one reference.
